

Marketing Division of: Anar Polymer Industries

Quality Control – Rubber Concept

Our existence for the last two decades as an undisputed market leader for Rubber products business, itself explains our worth at the quality front. We have a highly skilled technical team, which continuously upgrades the quality of products in terms of design, durability, performance, etc.

Every stage is supervised by a team of well trained professionals, thus hardly leaving even a marginal corner for faulty production. The finished products are thoroughly inspected for their specifications in order to ensure the flow of only premier items to the market.

The extremes to which we go in Quality and Service, assure customer a future-proof dependable Rubber Products.

Marketing Division of: Anar Polymer Industries

In order to meet stringent requirement of Rubber properties for varied applications, we have developed world class Rubber Laboratory, where following properties are tested on regular basis.

- ❖ Tensile Strength
- ❖ Elongation at Break
- ❖ Compression Set
- ❖ Oil Resistance
- ❖ Specific Gravity
- ❖ Hardness (Shore A)
- ❖ Modulus at 300% elongation
- ❖ Heat Resistance
- ❖ Fluid Resistance
- ❖ Rebound Resilience

Apart from above Rubber related testing, following measuring instruments are used to ensure that customer receives product as per the specification

- ❖ Vernier Calipers
- ❖ Height Gauge
- ❖ Bore Gauge
- ❖ Digital Micrometer
- ❖ Surface plate to check Run-out
