

Marketing Division of: Anar Polymer Industries

## **Rubber Concept**

**Catering to the requirement of various industries by offering an array of premier grade Rubber components since 1984.....**

In an effort to serve the Rubber Industry with latest technological advancements, Mr. Darshan Shah have stepped ahead with establishment of an entity: “**Rubber Concept**” in alliance with “Anar Polymer Industries”

**Mr. Darshan Shah: M. Tech (IIT-Kharagpur), B.E. (Rubber Technology)**

**Rubber Concept** has a goal to cater Rubber market with continuous innovation in manufacturing process to achieve best quality. We are backed by a qualified team of acumen and pro-active employees as well as advanced machinery to engineer world class products for our reputed clients.

**Anar Polymer Industries** is a renowned manufacturer and exporter of unmatched rubber components **since 1984**. Promoted by **Mr. Janak Shah** and **Mr. Ajay Shah**, Anar Polymer Industries has seen growth by leaps and bounds owing to its integrity, reliability and complete understanding of the market dynamics

Our vision is to achieve Rubber Products manufacturing leadership in supplying **High Quality Rubber Products** and Solutions of Rubber Queries to our clients in selected horizontal and vertical segments, by **Combining Technology Skills, Compounding Expertise, Process Focus and a Commitment to Long-term Customer Relationships**.

## **Rubber Dam Gate Seals**

**Rubber Concept (RC)** manufactures a wide range of rubber Seals: Vertical and companion backstop water stop, Music Note, Z-type, Arrow-type and Flat dam gate seals. These are designed to either retain water, prevent water penetration, or limit contaminated run off in civil engineering applications.

The inherent elasticity and resilience of **RC** Gate seals allow it to retain its sealing effectiveness in situations where there are fluctuating movements caused by water pressure, traffic, subsidence or seismic movement.

Unlike thermoplastic materials such as PVC, rubber seals remain dimensionally stable and functionally effective over many years whilst handling movement far in excess of the capability of PVC. Rubber seals provide superior resistance to chemical attack and heat degradation.

Quality of **RC** dam gate seals are very well accepted by various Government and private agencies. We have supplied numerous Gate seals for no. of dams across Gujarat and India. Our gates are also been accepted as **Hydrogates in power supply**.

**RC** produces Dam gate seal by Moulding method, Quality of which is better than extruded seals. Pressurized curing during moulding ensures close dimensional control, superior physical properties, compact microstructures, thus improved durability and functionality.
